Western Pacific Storage Solutions

We manufacture storage system products that streamline any operation and promote savings.

- Over 30 years of trusted brands
- Dedicated to being your value-added supplier
- Customer service managers and design associates covering three time zones
- Robust engineering team and CAD operators provide the support you require
- Three distribution centers reduce transportation costs
- Best lead times available in the Material Handling Industry

We Have The Storage Solution for You

RiveTier®
The Original Boltless Shelving

RiveTier® Systems maximize existing square footage economically – all shelving can be disassembled with ease, transported, and recombined to create extra storage where needed.

- Installation costs are 30-40% lower than bolted shelving because rapid effortless assembly requires much less time
- 14 Gauge Steel Tough and Versatile - RiveTier® systems can handle long spans and low-profiles. Heavy-duty posts for catwalk applications. Completely freestanding
- Four-sided Access - No sway or cross bracing means employees have four-side access to product. Completely freestanding

The Original Boltless Shelving!

Pacific
Compression Clip Shelving

Pacific Compression Clip Shelving

- Cost effective.
- Open shelving provides the most basic all-purpose storage.
- Industrial Clip shelving offers an affordable option for light to medium duty applications.
- Closed shelving includes metal back and side enclosing panels added to the basic open unit.
- Bin units utilize full-height dividers to create individual storage bins.
- Catwalk systems efficiently expand your capacity while minimizing your overhead costs.

Design and Engineering

Our systems are designed to grow with your business. WPSS' design and engineering teams can custom develop a system to meet your needs—and your budget—no matter what your business application.

INDUSTRIAL STRUCTURES

Unique Bidirectional Frame

Industrial Structures

Freestanding Work Platform (Mezzanine) Systems

A traditional expansion project could cost nearly three times as much as a platform installation – not including permits or land cost. Western Pacific's LEAN manufacturing principles guide every step, further driving down construction costs and adding much needed square footage to facilities.

- **Engineering Clarity** Comprehensive engineering documents for a less stressful permitting and construction process
- **Cubic Efficiency** Improve your facility's space allocation – build up, not out
- **Cost Effectiveness** Lower constructions costs often by 3x, over new construction

DELUXE

The Original Box Shelf

The Deluxe Original Box Shelf

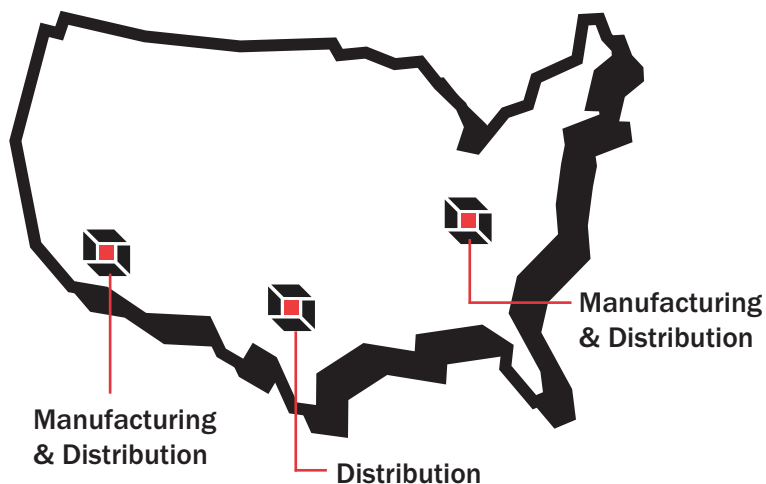

offers strength. Deluxe heavy-duty allows you to take advantage of air space—more storage in a smaller footprint.

- **Deluxe Versatility:** a variety of shelf and post configurations effectively solve all storage issues
- **High-Performance Capacity:** support 350 or 1,000 pounds per shelf, get the most appropriate capacity
- **Deluxe Expands:** confidently install 9' of Deluxe, leave room for expansion in any direction.
- **Deluxe in Seismic Areas enables Multi-level:** In some areas, Deluxe easily supports 4 levels while others stop at 3 levels of shelving.
