

## Picking, Packing, and Loading Conveyor Application Guidelines

At some point in your daily operation, you pick, pack and load (or unload) a product from a piece of mechanized machinery into a carton, tote or box. While many of these processes are fully automated today, Cisco-Eagle has designed a quick checklist to assist you in picking the correct type of conveyor or conveyor system for your specific application.

Here is a quick checklist we have to ensure that your process is streamlined for optimum performance. Also, remember that by streamlining your process, you create a sustainable, more energy and cost efficient operation.

<b>Pick Stations</b>	Totes, boxes, bags or post-packaged product	<b>Minimum pressure accumulation-Model ACC</b> <b>Zero pressure accumulation (no touch staging) – Model ABEZ or E24EZ</b> <i>(24 volt REVOLUTIONARY conveyor)</i> <b>Slider bed or belted conveyor – Model TA or TL</b> <b>Belt over Roller for heavier operations – Model RB</b>
<b>Dunnage – Fill</b>	Boxes or bags	<b>Minimum pressure accumulation – Model ACC</b> <b>Zero pressure accumulation (no touch staging) – Model ABEZ or E24EZ</b> <i>(24 volt REVOLUTIONARY conveyor)</i>
<b>Pick to light</b>	Totes or boxes	<b>Minimum pressure accumulation – Model ACC</b> <b>Zero pressure accumulation (no touch staging) – Model ABEZ or E24EZ</b> <i>(24 volt REVOLUTIONARY conveyor)</i> <b>Gravity conveyor – 1.9” rollers, skatewheel or 1 3/8” available</b>
<b>Labeling</b>	Boxes, product or bag	<b>Slider bed or belted conveyor – Model TA or TL</b> <b>Minimum pressure accumulation – Model ACC</b>
<b>Wrapping, banding or strapping</b>	Pallets, boxes or product stacked	<b>Pallet conveyor or chain roller type – Model CRR</b> <b>Zero pressure accumulation (no touch staging) – Model ABEZ or E24EZ</b> <i>(24 volt REVOLUTIONARY conveyor)</i>
