TWO YELLOW JACKET PROFILES AVAILABLE

YELLOW JACKET is a state-of-the-art modular rack armor system that is as flexible as you need it to be. It is available in two profiles to fit 3"x3" and 3"x 1-5/8" rack uprights. Each 9" tall **YELLOW JACKET** section is stackable, allowing you to determine the optimal amount of protection for your warehouse racks and equipment. **YELLOW JACKET** is specially designed to utilize tension to lock into place and includes a bolt and wing nut to keep it fastened to the rack. With **YELLOW JACKET**, it's easy to avoid expensive replacements while protecting your warehouse racks and inventory.

YJ-3x3
Fits 3"x3" Rack

YJ-3x1-5/8
Fits 3"x 1-5/8" Rack

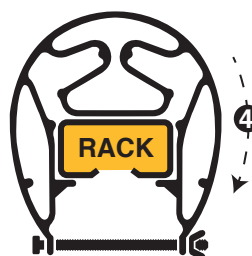

INSTALLATION INSTRUCTIONS

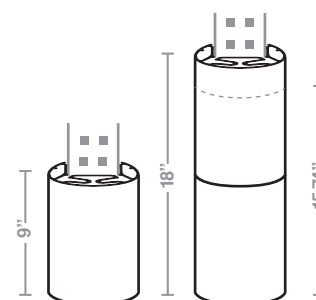

- 1 Latch tab behind back corner of rack leg.
- 2 Stretch Yellow Jacket around rack leg.

- 3 Press center of Yellow Jacket down, pushing tab over opposite corner of rack.

- 4 Rotate Yellow Jacket around rack leg. Snap tab securely over back corner and secure with bolt and wing nut.

Stack two 9" Yellow Jackets for more protection than the industry recommended 400mm or 15.74 inches.

ENGLISH
ESPAÑOL

- 1 Abroche la lengüeta que se encuentra detrás de la esquina posterior de la pata de la anaquel (rack)
- 2 Restire "Yellow Jacket" sobre la pata de la anaquel (rack)

- 3 Presione el centro del "Yellow Jacket," empujando la lengüeta sobre la esquina opuesta de la anaquel (rack)

- 4 Gire el "Yellow Jacket" alrededor de la pata de la anaquel. Coloque la lengüeta de manera segura sobre la esquina posterior y asegúrela con un tornillo y tuerca de mariposa.

Coloque el "Yellow Jacket" encima de otro, lo cual proporcionará mayor protección comparado con que la recomendación industrial de 400mm o 15.74 pulgadas.
